SIEMENS
Ingenuity for life

Let's innovate and make things real that matter!
Connect. Collaborate. Co-Create.

The world around us is changing fast, help us to expand the Open Innovation ecosystem inside and outside Siemens

We, the Open Innovation and Intrapreneurship Team (CT TIM) are looking for a Working Student (f/m/d)

You will help to:
- Further develop the corporate Open Innovation / Intrapreneurship Program
- Help to establish and settle our global Siemens Innovation platform with internal and external partner programs
- Identify and facilitate various Open Innovation methods, gain insights into technology and innovation management on a corporate level
- Support Open Innovation / Intrapreneurship initiatives such as Challenges, Ecosystems, Platforms, etc.
- Support to organize and conduct innovation community webcasts to engage, inform and educate Siemens employees from all over the world

Your profile:
- Currently enrolled in Bachelor/Master in the following disciplines: Innovation Management, Technology Management, Communication, Business Administration, Entrepreneurship or other.
- Solid Microsoft-Office skills (PowerPoint, Excel etc.), preferably HTML/website development experience
- Open minded with visionary mindset, a hands-on mentality and enthusiasm to create
- Language skills: English and German

We offer:
- Highly motivated startup-like team
- Diverse tasks (management of project parts, power point presentations, template creation, working in the backend of the platform)
- Flexible working hours (min. 16 preferred)

Die Zentralabteilung **Corporate Technology** (www.ct.siemens.com) nimmt mit ihren weltweit über 1.900 Forschern innerhalb der Forschung und Entwicklung von Siemens eine besondere Stellung ein: Sie wirkt als internationales Netzwerk der Kompetenzen und weltweit als Partner für Technologie und Innovationen

Innerhalb von Corporate Technology ist **Open Innovation** Teil der Strategieabteilung **Technology & Innovation Management (TIM)**. TIM richtet den Blick in die technologische Zukunft und definiert Methoden sowie Technologiethemen und -projekte für Corporate Technology und Siemens.
